

Exercise 3:

Question: Why should our company use SAP? Write approximately one page.

Introduction

Every department currently works independently using different systems or manual methods. This often causes delays, duplicate work, inconsistent data, and reporting challenges.

Problem

For example:

Sales doesn't know stock.

Purchase doesn't know requirements.

Finance waits for invoices.

IT cannot track assets.

Maintenance history gets lost.

Solution

SAP integrates every department into one system.

Everyone uses the same database.

Information is updated instantly.

Benefits

Improved productivity

Less paperwork

Accurate reports

Faster approvals

Better inventory management

Better asset management

Improved customer satisfaction

Reduced operational cost

Conclusion

SAP helps companies make faster and better decisions by integrating all business functions into one secure and reliable platform.
